

Both the ChatroomServer.java and ChatScreen.java require the json-simple jar file to be in the class path. I will include the jar file in what I turn in. Compilation and running the ChatroomServer:

```
javac -cp ./path_to_jar_file ChatroomServer.java  
java -cp ./path_to_jar_file ChatroomServer
```

ChatScreen Compilation:

```
javac -cp ./path_to_jar_file ChatScreen.java
```

Running:

```
java -cp ./path_to_jar_file ChatScreen <IP of the Server> <username>
```
